Replacement Air Filter for Bajaj Pulsar motorcycles made from 2006-2011 with 150, 180, 200 and 220 cc engines.

DEMAND OF A POWERFUL PERFORMANCE FOR BIKES UNTAPPED....

Based on the increasing demand for the K&N high performance filters from owners of Pulsars. K&N has finally offered their expertise to introduce a replacement filter for the Bajaj. This is definitely a milestone for Methods Automotive and for the worlds leading manufacturer of cotton gauze high performance air filter as part of the future plans for India.

Bikes have always been a passion amongst the Indian youth. It was not long back, when India was content with fuel-efficient small capacity bikes ranging between 80 to 125cc engines. There was a segment amongst the Indian youth then, who were waiting for a performance filled, powerful bike which could help them in embracing the power of a beast machine and make them go ZOOOOOMMMM!!!!!!

This market was tapped by BAJAJ PULSAR, which started with a 150cc segment and in due course has come to a level where it is sold 5 times more than any Japanese sports bike in India. With engine capacity starting from 135cc to 220 cc (135cc, 150cc, 180cc, 200cc and 220cc), Pulsar has become the most loved motorcycle amongst the biker boys in India.

Methods Automotive Pvt. Ltd. proudly announces the launch & availability of K&N Filters (the best air filters in the world), for BAJAJ PULSAR. This washable/reusable, pre-oiled and ready to ride filter (**BA-2201**) is specifically designed to fit into stock air filter assembly for performance models of pulsar i.e. 150cc, 180cc, 200cc & 220cc.
