

- **Project Title:** Simply Business - Tax Management Site
- **Attachment:** none
- **Completed:** 10/19/2009
- **Category:** Web Development > Web Programming
- **URL:** <http://www.simplybusiness.eu>
- **Description:** I was hired by i.e. Taxguard (<http://www.ietaxguard.co.uk>) to develop all the code and complex functionality for its new ASP.NET Simply Business web site from a pre-built static site template. The site's main purpose is to allow business users to sign up for online accounting services and tax return processing from a central portal.

Core to the success of this site was my incorporation of seamless integration points with Taxguard's internal CRM for lead/customer management and tax return workflow retrieval, and also with the online accounting system, provided by partner company KashFlow (<http://www.kashflow.co.uk>). Both of these aspects required me to additionally develop .NET web services for robust and well-managed communication between systems.

Latest News

It takes all your time just doing business to stay in business, so do you really have the time to be an accountant, tax adviser and admin clerk?

The Simply Business service has been designed to help you more easily manage your business and achieve greater success.

Simply Business makes it easy

- Manage your invoices.
- See who owes you money.
- Manage your cash flow.
- Get your Personal Tax Return in on time.

What makes up your Tax Return

To make a complete return, you'll need to provide details of your income and tax payments. The return is made up of several parts:

- Employment:** How much you've earned from your job or other employment.
- Self-employment:** How much you've earned from your own business or profession.
- Dividends:** How much you've received from shares in a company.
- Interest:** How much interest you've received from banks or other lenders.
- Capital Gains:** How much profit you've made from selling assets like shares or property.
