

- **Project Title:** Situation Response Web Site
- **Attachment:** none
- **Completed:** 10/2008
- **Category:** Web Development > Web Programming
- **URL:** <http://sitrep.onproof.net>
- **Description:** The client wanted a highly configurable, robust, high performance web application that would be used to manage hierarchical contacts, create distribution lists, create broadcast emails, and create web questionnaires targeted at various emergency and public sector organisations in times of pandemic (such as Swine Flu).

The email recipients would click on encrypted links within the email broadcasts which takes them to the questionnaires for completion.

Back office features would allow broadcasters to track responses and completed questionnaire forms

ASP.NET 3.5 technology was used together with Telerik web controls, along with a SQL Server 2005 database.
