Core Application Development

Note : *Dedicated Team for your Services*

Rohin- Data Management Solution (1 / 3)

Document Management

Outsource your document management requirements to Rohin Infotech will help you streamline, manage, and control crucial information even more efficiently while you cut down on infrastructural assets and internal resources required for the task. We provide enterprise-wide document management solutions across diverse industry verticals and ensure round-the-clock access to most essential information, so that you may take strategic decisions on time and gain in competitive edge.

Data Entry & Capture

Managing loads of data and extracting the right kind of information can be quite tedious at times. Many companies and organizations today prefer to Outsource Data Entry Work at offshore services locations, as it proves to be a low cost effective and more profitable option, and remove management headaches as well.

Rohin- Data Management Solution (2 / 3)

DataBase Generation

Our Database generation and profiling services are aimed to address this specific requirement of sales and marketing teams. We understand your exact decision maker and influencer profile from the perspective of their roles and responsibilities and deliver exactly those contacts with complete contact information including email. Finding the right decision makers and influencers at target accounts takes up almost 25-30% of a sales person's valuable time

DataBase Validation

Customer database validation service can scrub clients' existing databases to replace incorrect contacts, update contact information, validate targets, and ensure a uniform format, thus making it a current, correct and valuable sales asset.

Rohin of skilled personnel handles the laborious and time-consuming tasks of validating and updating clients' pre-existing databases by researching clients' target companies and verifying contact information.

Rohin- Data Management Solution (3 / 3)

Telemarketing Management

A call to a customer made effectively lets you understand his/her psyche at the first go, moreover being telephone call you get to collect the first hand information about his/her likes and dislikes. To top it all telemarketing offers you the opportunity to interact with a large database of customers in a short span cost effectively.

Once you become sure of the customers the rest becomes less challenging. All you need to do is design your marketing process and execute it with some talented telemarketers; just like the talent pool you would find in Rohin Infotech.

Rohin – Software Services (1 / 4)

Custom Web Application Development

Joomla Experts provide services for Joomla CMS, **Joomla web designer** specialize in custom **Joomla websites**. We provide fast and cost effective **PSD to Joomla Template conversion**.

Drupal is widely used for its standard features that really help in uploading customized content on dynamic websites with minimum efforts. We really believe that **Drupal CMS is the Good choice for any website** which is **looking for a robust and scalable CMS**.

Rohin – Our Products

Train Information Management System

Implemented : NDLS; PDLs; NIZM; Delhi Cant.

The Northern Railway (NR) is one amongst the nine older zones of Indian Railways. Delhi, the capital city of India, serves as the headquarters of Northern Railway. The whole zone is divided into five divisions namely Delhi, Ferozpur, Ambala, Lucknow and Moradabad for smooth administration.

The Challenge:

Providing a Train Schedule management system. Under the latest Scenario of Digitizing every part, train info/schedule management system scope is to inform commuters about the schedule time, arrival time, delay warnings, reasons about each and every train of respective station. It should be nicely wrapped with a backend UI to manage, add, edit, delete trains and at the same time can show informative images and video streaming to passengers. A real time application with sound interaction of client and server for seamless flow of real time data.

The Solution:

OS: Windows Client / Server

Languages: PHP5.2 , JQUERY, AJAX

Framework: Zend Framework

Database: MySQL

Workload: 1000+ Clients can add to the main Server by means of TIMS

Rohin – Our Products

- ☒ Sales Management
- ☒ Purchase Management
- ☒ Finance Management
- ☒ Inventory Management
- ☒ Taxation
 - Excise
 - VAT
 - TDS
 - Works Contract
 - ISD
 - Service Tax

Visual Udyog is an easy to use indirect taxation software that provides an accurate and integrated solution to handle both your business and tax compliance needs.

Indirect taxation process in any organization needs be handled carefully as it not only involves legal risks but also because it consumes 16-22% of the operating profit. With the complexity and constantly changing norms of taxation, it is very difficult to keep for organizations to keep track of the changes and adopt accordingly. Visual Udyog allows organizations to focus on their core business while the software takes care of automating the organization's business functions while managing to be in sync with the changing taxation rules and compliance requirements.

Visual Udyog handles all types of Indirect taxes like Excise Manufacturing, Excise Trading, Service TAX, VAT, TDS, GTA, Work Contract Tax. It also comes with core business modules like financial accounting, inventory and order processing, business intelligence which would assist you in streamlining the entire process within the organization. With increased process efficiency you could control the cost involved in the entire process flow.
