

**Futuristic eSolutions** is an IT consulting firm specializing in providing business solutions by utilizing advanced technology to solve today's more complex e-business challenges. We have earned the reputation of being a leader in the web and software development industry by successfully delivering creative and breakthrough strategies customized for each client.

## WHAT WE DO

Our expertise guarantees quality and rapid execution of any project. Our work ranges from building small websites to complex ecommerce software and custom solution programs. We use the full potential of modern internet technologies for the benefit of your business. We translate our knowledge of business and modern technologies into value for our customers through our professional solutions and services. We have a firm belief in aligning your IT with your business needs. **We are successful only if you are successful.**

At **Futuristic eSolutions**, we strive to provide best services to each client no matter how big or small.

### Our services include:

1. Website Design and Development
2. E-Commerce Development
3. Application Support and Maintenance
4. IT Infrastructure Solution
5. Database Development, Management, Maintenance and Support
6. Business Intelligence and Central Reporting Services (BI & SSRS)
7. SQL Server Integration Services (SSIS)
8. Excel Automation
9. Search Engine Marketing
10. Mobile Application Development

## WHO WE ARE

We are known for our ability to completely understand the business objectives of our clients and are able to translate those goals into successful business applications and targeted designs. Our core competencies exist in:

- Delivering excellent value for money - always
- Offering the best customer service in the industry
- Deliver what we promise
- Treating our clients as we would wish to be treated

Our client engagement process ensures that we invest enough time in understanding our clients business and their unique requirements, and ensuring that as we apply our considerable web solutions expertise and experience that we are involving the customer at each key stage of the process.

The most important part of the **Futuristic** recipe is their staff. We employ high achieving, friendly and professional staffs, which really do make dealing with Clients a pleasure.

## OUR APPROACH

---

Our proprietary approach has been developed, refined and continuously innovated since February 2006. Depending on the individual client objectives, desired services and deliverables, the service offerings may vary but the dedication and customer-services will not. **Futuristic eSolutions** engulfs itself into client projects, continuously searching for ways to enhance, innovate and impress. We take successful results personally. Here is a glimpse into our process.

### INITIAL CONSULT/INFORMATION SESSION:

We understand that each business is unique and has distinctive technical and business requirements. We take special care in understanding your business process and systems in order to tailor solutions to your needs. **Futuristic eSolutions** gathers information by conducting meetings/interviews with the clients and develop the architecture using our proprietary process. We then validate our structure based on various user profiles.

### DESIGN CONCEPTUALIZATION:

Design, Review, Refine, and Repeat. **Futuristic's** creative team uses a proven method to produce effective designs that match the client strategy and target audience.

### IMPLEMENTATION:

We do Web and Software Implementation, Interactive Design, Formatting, Functionality Development, Database Integration and CMS. At this stage, **Futuristic** brings the project to life. As interactivity is added, we are constantly looking for ways to improve, enhance and innovate. Many of the best Ideas are born here.

### TESTING:

Our approach is to Test, Review and Refine. We test on various technical common denominators to ensure optimal viewing results for target audience. The functionality and code is rigorously tested to make sure everything is working perfectly.

### DELIVER:

Delivery of Assets, Style Guide, and Knowledge Transfer. **Futuristic** make sure that the project is delivered and working properly and clients have all of the original assets and full understanding of the functionality.

### MEASURE, MAINTAIN, ENHANCE:

**Futuristic eSolutions** Services, Functionality Monitoring, Traffic Monitoring, Internal Reviews, User Surveys/Feedback, Customer Acquisition/Retention, Enhancement, and Strategic Planning.
