About Nascent

We take this opportunity to introduce ourselves and our organization engaged in software development work, consulting work related to software /web identification, designing, development, modification, up-gradation and implementation catering to several organizations.

With a blend of consulting and project management skill, we have already managed many business application software development projects. We have strong functional & commercial knowledge along with familiarity of current business processes; we can recommend changes and map them onto systems.

We have long implementation experience in respective functions in developing Entertainment Applications, Streaming Solutions, CRM's Solutions, Stand Alone Applications, financial application, Production Planning, Material Management System, Sales & Distribution, Plant and Maintenance, Human resources Application, E-Commerce (B2B & B2C) systems.

At Nascent, we focus on creating innovative, flexible, & cost effective web site design - Internet solutions designed for businesses, organizations, and professionals. It is commitment on our part to discipline ourselves to carry out our obligation and duties deemed as appropriate, morally responsible and of highest level of integrity in our job. We always deal with broadly defined codes of ethics, which aid our activities. We always try to be more sensible and responsive to our clients or customers while playing a role of advisor, a mediator, and a problem solver or combination of these roles.

We are always looking for a project cum opportunity bundled with new Challenges.

-  E-Commerce (B2B & B2C)

Nascent is a professional website design company with the capability of meeting all your requirements - from simple online brochure sites to full-fledged database driven e-commerce enabled retail websites.

At Nascent, we strive to strike a balance between creating high-end web designs and related cost for their development and management. Our website design services are extremely affordable and cost effective ensuring quality work at competitive rates.

Nascent has designed, promoted, and provided consultancy services on many websites for enterprises, large, medium and small scale business houses, entrepreneurs, home-based businesses, NGOs and amateurs.

Website design services at Nascent are viewed as a creative process that involves designing a website from scratch while keeping in mind customer requirements, visual appeal using tools such as Flash designs, compatibility with most popular browsers, content placement, search engine optimization, aesthetics and affordability. Repetition of designs or use of templates is discouraged unless requested by the customer. Emphasis is laid on visuals, graphics, banners and logos. We advise our clients to keep the web pages light, without compromising on need or quality, so that they open quickly even with a mediocre Internet connection.

Our approach is team based. We want your site to be a top quality site and make your investment rewarding. We sincerely believe a happy and satisfied customer is the best advertisement of our services.

Website Application

Web Applications have transgressed geographical boundaries thanks to an ever evolving open global economy. Web apps, a jargon that they are better known by, allows innovative bright ideas from varied sections of the globe to be floated across civilizations opening up new vistas to reach out and be recognized. Business ideas have never had more beneficial breeding grounds, than what is offered now, through progressive thinking applications.

Platforms supporting B2B (Business to Business), B2C (Business to customer) and C2C (Customer to customer) frameworks provide accessibility to a varied set of applications ranging from simple ecommerce facilities to complicated stock broking or banking systems. Rapid and deep internet proliferation, across the globe, boosts the reach and impact of custom web application drastically.

We at Nascent focus on being proactive technical and functional Consultants to our clients by not merely delivering quality apps but exploiting our vast experience and expertise to comply it with the end users' needs.

Nascent is a fully integrated IT consulting and web solutions provider, developing custom web applications, social platforms, online advertising platforms, web site development, desktop and console applications. Our team of experienced developers has been working relentlessly to serve our clients globally. We have a professional team of ASP.NET, C# and Flash/Flex Programmers, who specialize in web application development.

Nascent's comprehensive IT solutions and services include Product Engineering, IT consulting and Research & Development services to organizations and institutions globally. To know more about us and our processes, kindly visit our corporate site at www.nascent.co.in

SMS Solutions

Ever since the inception of the Microsoft dot net frame works, Nascent has been extensively developing web, desktop and console applications using Microsoft dot net frame work.

At Nascent we recognize that the .NET framework is fast becoming the most popular environment for building, deploying, and running concurrent web services and applications. Its feature-rich application execution environment, simplified development and easy integration between a number of different development languages is increasing its acceptance. Designed to provide an object-oriented programming environment that guarantees the safe execution of code and to eliminate the issues with performance normally associated with scripted environments.

In today's world of collaborative manufacturing production and supply chain integration, our options follow the most commonly used standard to offer the easiest integration with different platforms and software packages We provide numerous solutions using Microsoft .NET as it has a lot of built-in support for different languages:

Entertainment applications	Streaming solutions	CRM's
Stand alone applications	Financial applications	E- com solutions
Mobile applications		

Our Microsoft Dot Net competency includes:

NET Enterprise Servers	Visual Basic.NET	C#
Web Forms, Web Services and Web Server Controls	Web Services	Win Forms
ASP.NET, ADO.net	SQL Server 2000/2005	Windows CE.NET

Nascent is the answer if you are looking for:

Microsoft.net development, ASP.NET development, VB.NET development.
